Profile

I am a results-driven Data Analyst with expertise in SQL, Excel, Power BI, Tableau, and Python, specialising in data analysis, visualisation, business research, and actionable reporting. Skilled in process improvement, workflow automation, AI-assisted analytics, and developing digital solutions that enhance operational efficiency. Adept at translating complex data into business insights, optimising processes, and supporting strategic decision-making through analytical thinking and effective stakeholder communication.

Technical Skills

Data Analysis and Visualisation tools
Excel, Tableau, Power BI, Python (Pandas, NumPy, Matplotlib, Seaborn)

Datastores
SQL (MySQL, PostgreSQL) and NoSQL (MongoDB), Redis

Operating System/Scripting
Linux/unix

Server Management
Automation and Scripting (Bash, Power Shell)

Programming Language
Python, JavaScript, SQL, NoSQL

AI & Automation
LLMs (ChatGPT, Claude, Gemini), AI-Assisted Analytics, Google Apps Script, and Workflow Automation.

Statistical Analysis
Regression, Hypothesis, Testing and Confidence Intervals

Data Modelling
Data Warehousing, ETL and Data governance

Version Control
Git and Github

Database Design
- Schema design
- Normalization and indexing
- Data Modelling
- Query Optimisation
- Performance tuning

Digital Solutions & Reporting
Employee ID Card and Verification Portals, Client Documentation Dashboards, Payroll Data Validation, and Executive Reporting.

Professional Experience

Business Analyst, *Proten international* 02/2026 – Present
Lagos, Nigeria

- Conducted business, HR, and industry research to identify business needs, assess market trends, evaluate risks, and provide evidence-based recommendations for strategic decision-making.
- Leverage advanced SQL, Excel, and Power BI skills to extract, clean, validate, and analyse large datasets, identify patterns, and translate business data into actionable insights.
- Designed and implemented an employee ID card portal and verification portal, streamlining employee identification, verification processes, and information accessibility.
- Built and manage a centralized documentation dashboard across client accounts, improving document visibility, tracking, record management, and access to client information.

- Develop interactive Power BI dashboards, analytical reports, and executive presentations to monitor performance, communicate findings, and support data-driven business decisions.
- Support payroll operations through data validation, reconciliation, record maintenance, and discrepancy identification to improve payroll accuracy and reporting reliability.
- Conduct market research, competitive analysis, and scenario assessments to evaluate business performance, workforce challenges, and strategic opportunities.
- Develop research reports and evidence-based white papers on workforce analytics, organizational development, HR trends, and business strategy, translating complex findings into practical recommendations.
- Identify opportunities for process improvement and workflow automation, including developing Google Apps Script solutions for email outreach and survey tracking to reduce manual effort and improve operational efficiency.
- Coordinate stakeholder and client engagement, manage large-scale survey distribution, monitor participation metrics, and support research initiatives through structured communication and reporting.

Data Analyst, *Octofi Limited* 06/2024 – 01/2026
Awka, Nigeria

- Used SQL to query, analyse, and validate transaction and service request data, identifying irregular patterns and supporting timely operational decisions.
- Leveraged a decision engine to flag unusual transactions for further investigation and evaluate internet service requests against predefined business rules and eligibility criteria.
- Investigated flagged transactions and exceptions by reviewing underlying records, identifying inconsistencies, and providing data to support resolution.
- Analysed internet service request records to assess outcomes, identify recurring issues, and support improvements in request processing and service delivery.
- Conducted data quality checks to identify inaccurate, incomplete, or inconsistent records, helping maintain reliable information for operational monitoring.
- Translated data findings into actionable insights to support transaction monitoring, service request evaluation, and business process improvement.
- Collaborated with relevant teams to investigate data discrepancies, clarify decision outcomes, and improve the reliability of operational reporting.

Risk Manager, *Standard Bank* 03/2025 – 04/2025

- Completed a job simulation acting as a manager at Standard Bank
- Analysed existing internal documentation(policies and procedures) to understand existing risk mitigation practices and ascertain where weakness exist
- Comprehensively documented the existing risk mitigation practices(risks and corresponding controls) via a control matrix
- Communicated a summary of identified risk mitigation weaknesses and proposed improvements via PowerPoint deck

Data Analyst, *Ekiti State Government Bureau of Statistics* 09/2023 – 02/2024
Ekiti, Nigeria

- Collected, organized, and analyzed data from diverse sources to support statistical outputs and inform policy decisions.
- Conducted rigorous data analysis utilizing appropriate statistical techniques and prepared comprehensive reports for stakeholders.
- Contributed to research initiatives focused on socio-economic development in Ekiti State, providing data-driven insights to facilitate informed decision-making.
- Generated and published key indicators across sectors to support planning and evaluation.

- Worked collaboratively with government agencies and stakeholders to ensure data consistency, avoid duplication, and enhance statistical coherence.
- Provided technical assistance in data management and analysis utilizing Microsoft Excel and other statistical packages.

Business Operations Analyst, *Dekur Clothings* 01/2020 – 07/2022
Ibadan, Nigeria

- Conducted market research and competitor analysis to identify opportunities and challenges in the fashion industry
- Analysed sales data to identify trends, patterns, and insight, and presented findings to stakeholders
- Developed Dashboard and report using Power BI to track sales performance, inventory levels and customer behaviour
- Implemented data quality and governance policies to ensure data accuracy and integrity

Data Entry Officer, *National Identity Management commission* 02/2019 – 11/2020
Akungba, Nigeria

- Analysed registration trends and patterns to identify areas for process improvement
- Utilized Power BI to present registration data to internal teams
- Managed registration data of over 10,000 individuals, ensuring accuracy and attention to details
- Developed and maintained reports to track registration metrics and provide insights to stakeholders
- demonstrated strong problem-solving skills in resolving registration issues and discrepancies

Education

Degree in History and International Studies (B.A), *Adekunle Ajasin University* 04/2017 – 09/2023
Akungba Akoko, Nigeria

Soft Skills

- Exceptional time management and Organisational skills
- Collaboration and Critical thinking
- Analytical thinking
- Explaining Insights to non-technical stakeholders
- Adaptability and flexibility
- Goal setting and achievement
- Writing reports and creating dashboard

Certificates

Intermediate python for Data Analysis
Data camp This course entails data manipulation with NumPy and Pandas library

Data Analysis with Excel
Coursera This course focuses on creating pivot charts, advanced charts and using conditional formatting

Data Visualisation in PowerBi
Data Camp This course entails connecting various data sources, data transformation, building data models and creating visualisations.
